100% MADE IN ITALY

3XL1037
Multifunctional variable height gynaecological couch

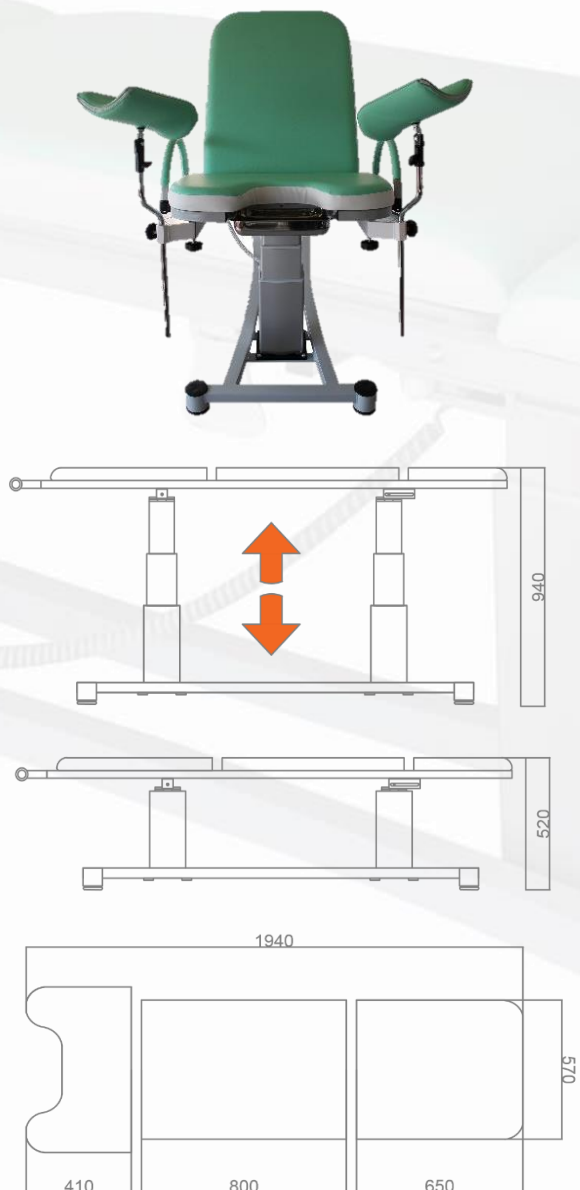

CE

3XL1037

BASIC CONFIGURATION

The couch is made of tubular furniture with remarkable performance characteristics that guarantee stability and sturdiness. It comes with this innovative line that makes it very comfortable and easy to use. The cushions can be reclined by means of 2 gas springs operated by the ergonomic levers under the upper frame. The two electric columns allow height adjustment and in addition to the simultaneous and parallel movement they are able to move in a distinct manner allowing the structure to reach the TR / RTR position very quickly, using a push-button panel. The top surface is padded with fire-retardant high-density class 1 IM rubber (skai, imitation leather) washable with common detergents on the market. It is a multi-purpose bed because by adjusting the central cushion it is possible to have a comfortable chair suitable for specialist visits. The structure is equipped with a roll holder, a rectangular shaped stainless steel container; the anatomical leg loops are sliding and adjustable in all directions on request they can be colour-customised. It is equipped with 4 adjustable 80mm diameter feet.

The electrical parts comply with the regulations in force in the hospital field.

TECHNICAL FEATURES

The construction materials are rectangular and round square tubes for Uni 7947/81 and 8913 furniture, DIN 2394, threaded sleeves in AVP, FE plates. The structure follows a process of phospho-degreasing, rinsing and application of the polymerised powder paint at 200°C, its minimum thickness is 70/80 micron. The finish is glossy. High density fire retardant rubber padding, covered with class 1 IM flame retardant coated fabric. 2000N electric vertical columns each. 400N and 600N gas springs.
